
Why the synthetic creak differs from recorded metal friction
Rejected synth
Current 0.72 s rotary sound
Recorded clothesline
AlexLane · source 12–14 s · CC0
Recorded metal gate
DenisChardonnet · complete clip · CC0
Waveform
Frequency (kHz)
Time in excerpt (seconds)
Clip ends
at 1.18 s
STFT magnitude (dB; waveform peaks normalized to 1)
Same time / frequency / colour scales · No pitch or time changes · 24 kHz mono · Hann 42.7 ms window, 5.3 ms hop
Peak normalization exposes structure, not in-game volume. References are compressed previews; listening remains decisive.
